

Vitabese Capsules Feel fuller faster

Key Ingredients: Each capsule contains - Vitamin A, Vitamin D, Thiamine HCL, Riboflavin, PABA, Ascorbic Acid, Chromium, Sodium Carboxymethylcellulose

Vitabese™ works in two ways; as an appetite controller and as a fat and sugar binder. Before meals, taken with an 8oz glass of water, Vitabese™ can swell seven times its dry volume in the stomach. This promotes a feeling of fullness and prevents over-eating. During digestion, Vitabese™ is thought to surround sugar and fat molecules and thus minimize their absorption by the body*.

Vitabese™ is a weight loss aid that contains vitamins, minerals and a bulking agent to create a feeling of fullness and help curb appetite. Recent studies suggest some overweight people are "resistant to their own insulin". Authorities believe this "insulin resistance" may be linked to chronic low levels of dietary chromium. Chromium, an essential trace mineral has been added to this combination to aid in the metabolism of sugar and other carbohydrates*.

Three things those are important to the relationship of insulin within the body process:

1. Promotes growth of lean muscle tissue while losing fat
2. Reduction of sugar cravings
3. Stimulates production of fat burning hormones, increasing the rate of metabolism burning calories more rapidly
